- 2. URIS Group B Application

Date received from Parent/Guardian: _____

- 1. Signed & completed URIS Group B Application

Date sent to Health Authority for approval: _____

Date the Individual Health Care Plan received and implemented: _____

Dear Parent/Guardian,

Please **complete and sign** the URIS Group B Application and **return it to the school**. Once approved you will be contacted a Public Health Nurse to discuss your child's health care needs and create an Individual Health Care Plan suitable for them. This health care plan will be reviewed every year and as necessary so the staff has the current health information and treatment plan for your child.

The Unified Referral and Intake System (URIS) is a joint initiative of the provincial government departments of Health, Education and Family Services. URIS provides support for children with specific health care needs (e.g., asthma, life-threatening allergies, diabetes, seizures) when they are attending school, child care facility or other community programs. When a child is approved for URIS support, a Registered Nurse develops a health care plan and provides training to community program staff. Southern Health/Santé Sud provides URIS support in your child's community program.

Your child's school has requested URIS support for his/her health condition. Individual Health Care Plans (IHCP) for the various health care needs have been established by URIS and was developed through consultation with clinical experts. It is the recommended practice for responding to health issues in community program settings.

It is important that we work together to support your child's health care needs and we appreciate the time and information that you have provided. Once you have returned the attached plan to the school/child care facility, I will review it and call you if I have any questions. The plan will be used by the staff to guide their response if your child experiences difficulty with his/her condition.

If you have any questions please feel free to contact me.
