

“The principal must inspect the school premises and report any necessary repairs promptly to the Secretary-Treasurer of the school board or other person designated for that purpose by the school board, and must endeavour to ensure that the premises are properly cared for by the pupils of the school.” (M.R. 468/88-37)

School Principals shall ensure that inspections of school buildings and grounds be made. The MAST – MASBO **Playground Safety Manual** is a recommended resource in the performance of playgrounds inspection.

The foregoing does not exempt the staff from their responsibility of reporting to the School Principal conditions which they consider a safety hazard.
